

Default ROS 2 Problem

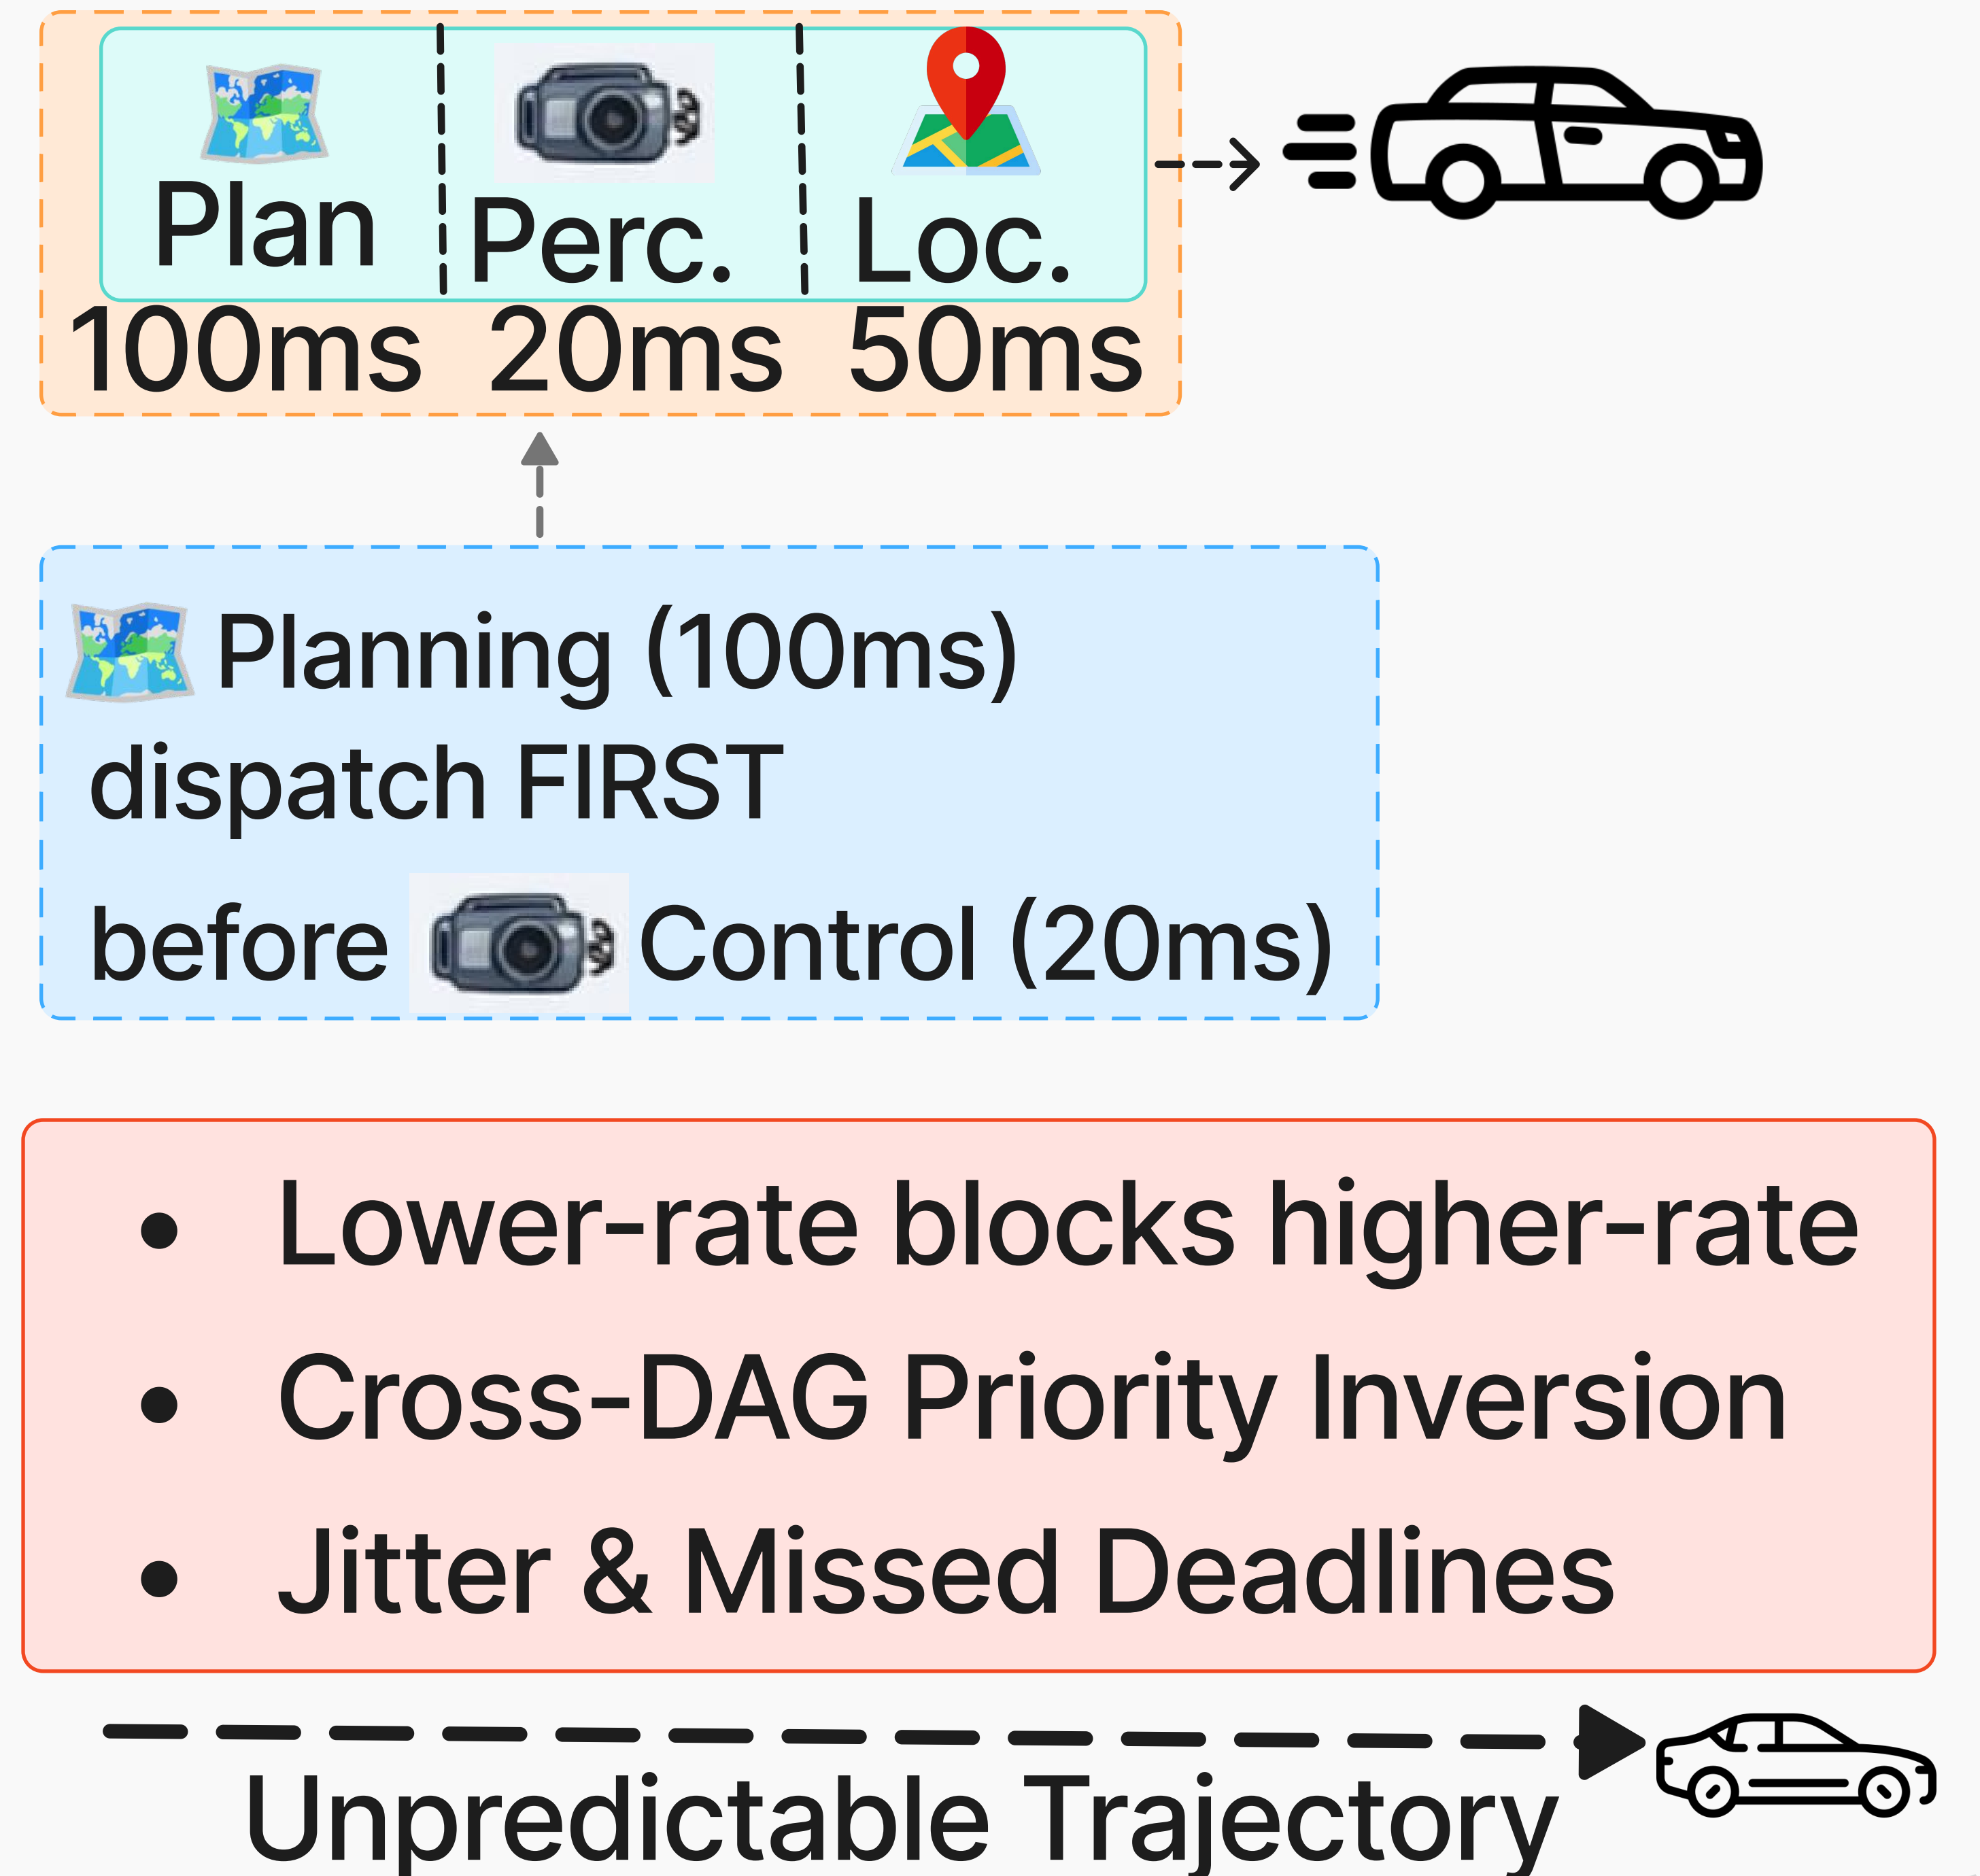

(A) Default ROS2 Executor Behavior

Multiple independent DAGs:

(B) Cross-DAG Priority Inversion

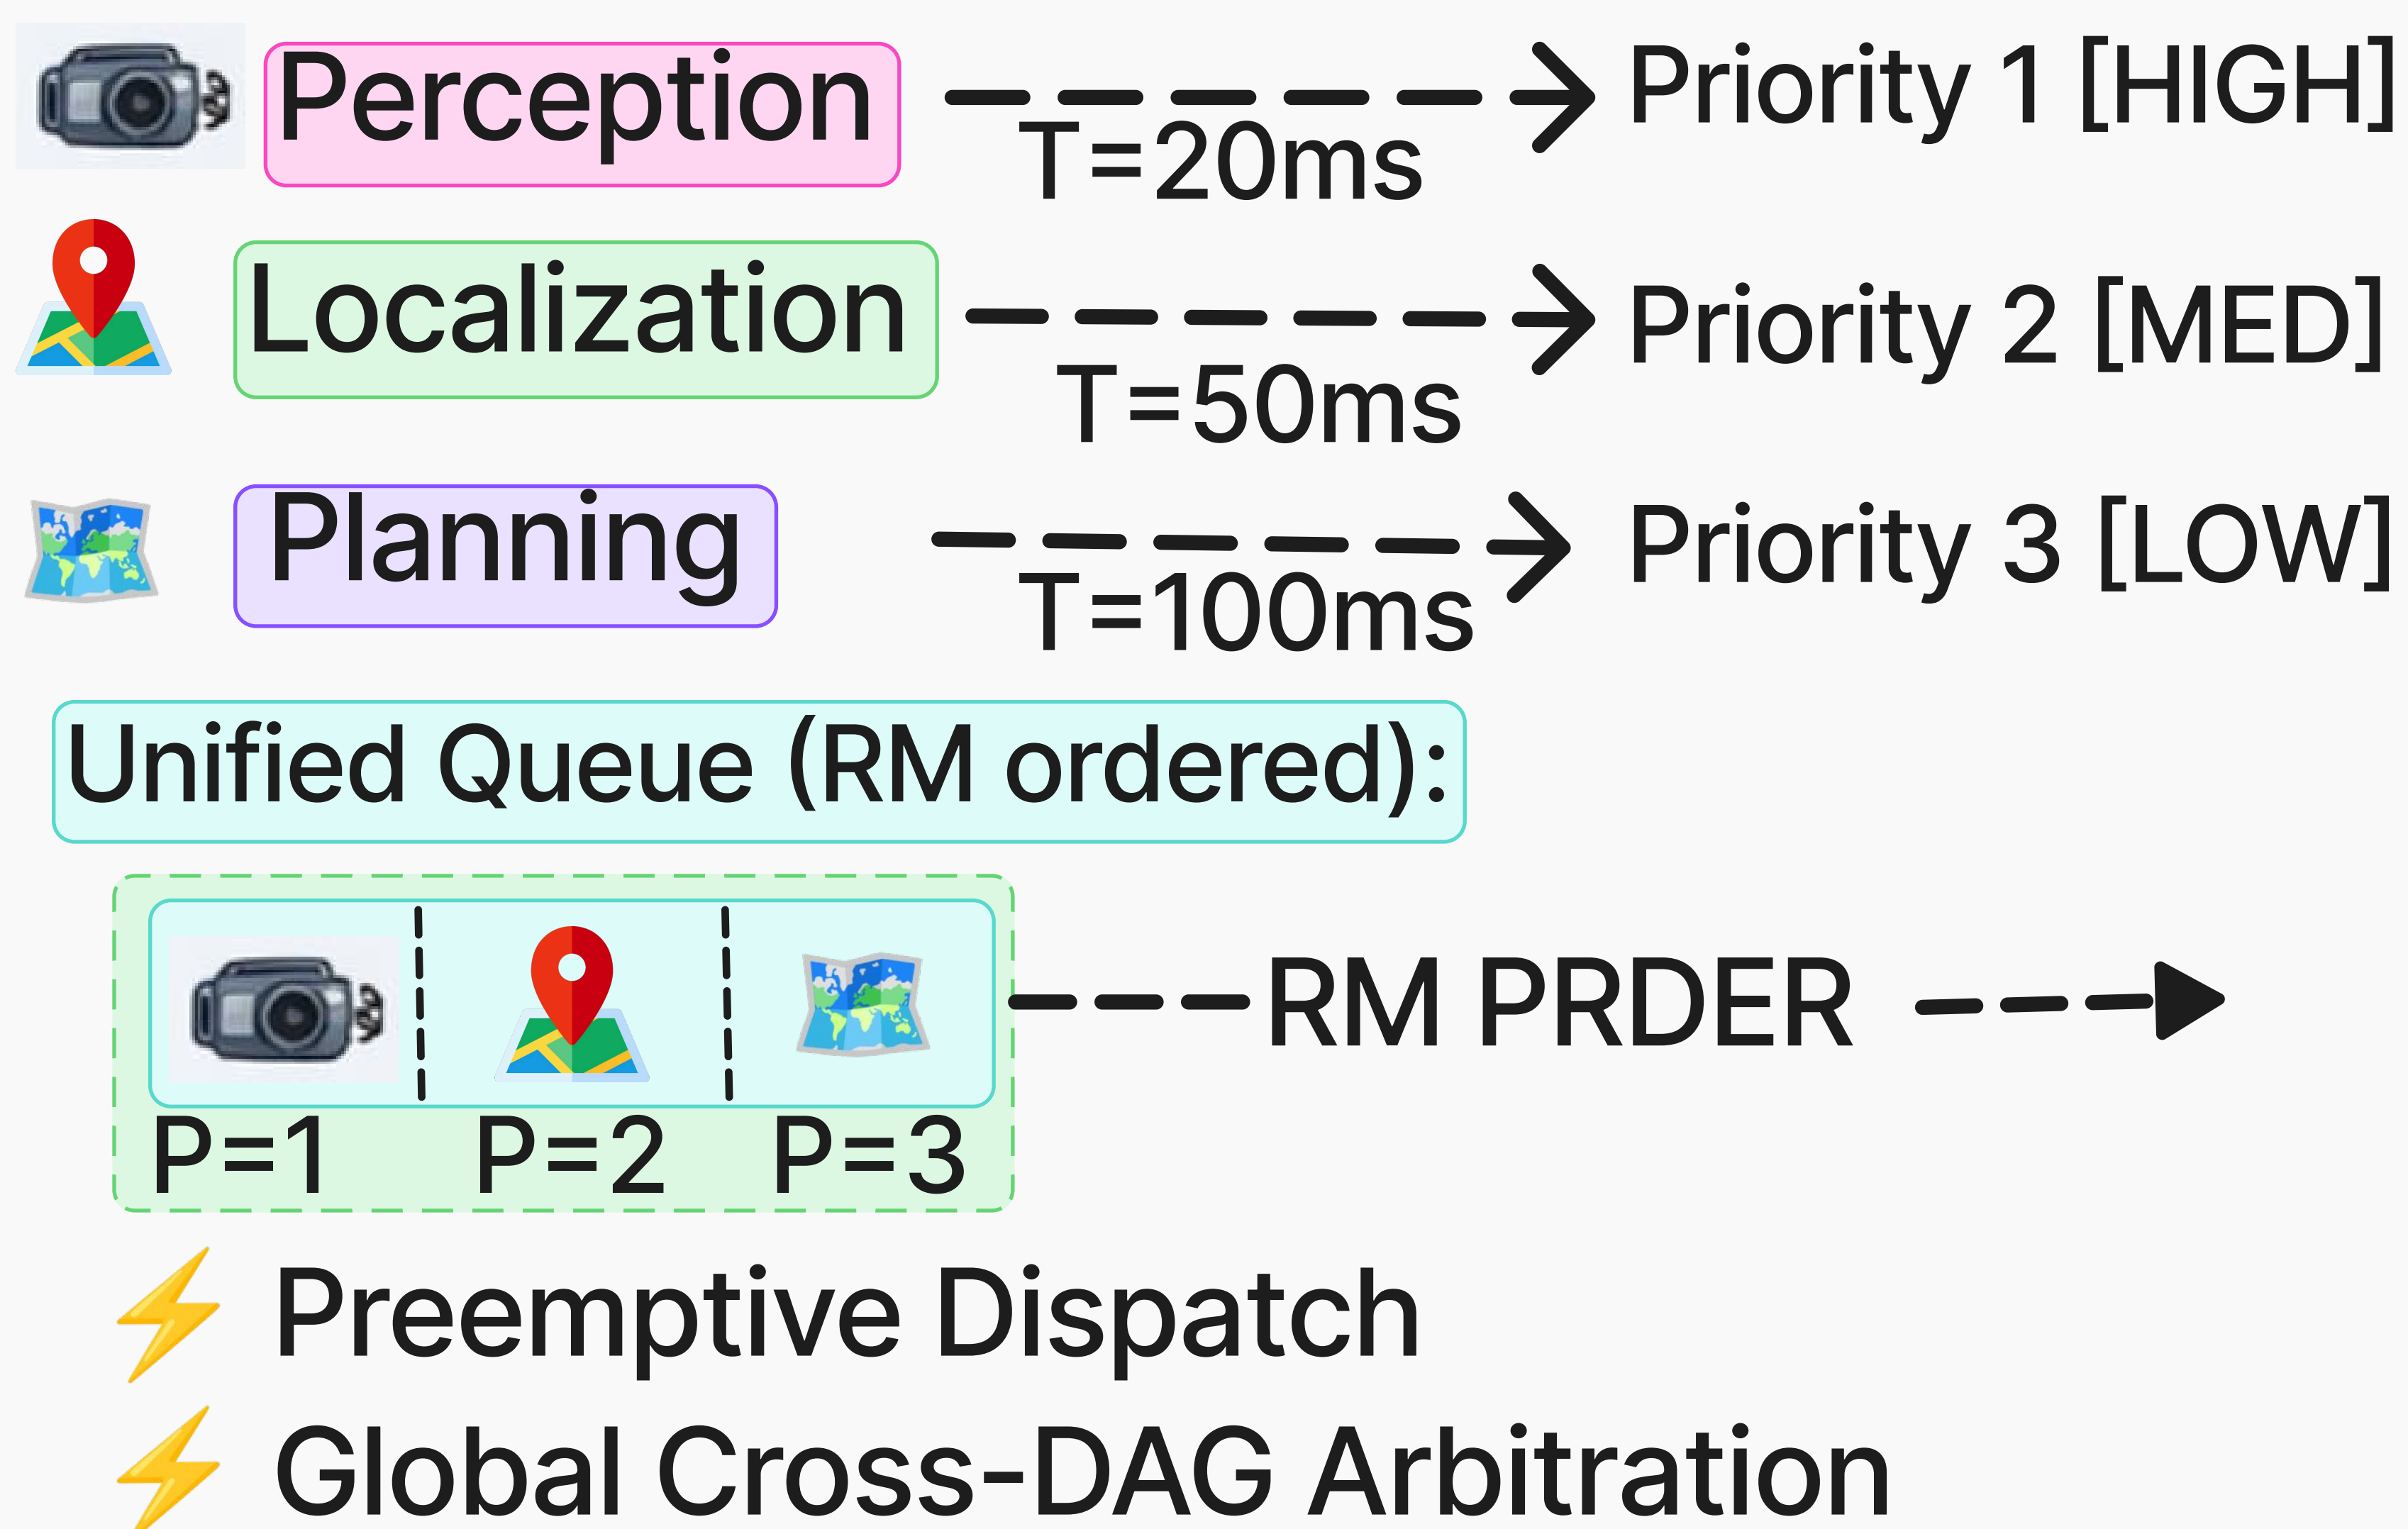

FIFO Queue (Arrival Order):

SOLUTION

(C) ReDAG^{RT} Scheduling

Rate-Monotonic Priority Rule:

(D) Deterministic Multi-DAG Execution

- ✓ Enforced Rate Priority
- ✓ No Priority Inversion
- ✓ Bounded Response Times
- ✓ Reduced Jitter & Meet Deadlines
- ✓ Predictable Real-Time Performance

Execution Order (RM):
